- **Food:** Sushi
- **Animal:** Polar Bears and Dogs
- **TV Show:** Brooklyn 99
- **Movie:** The Sound of Music
- **Book:** All the Light We Cannot See
- **Hobbies:** Reading and Doing Anything Outside

My Story

At my kindergarten graduation, I excitedly announced that I was going to be a teacher when I grew up. What I wanted to teach has changed several times, but my five year-old self knew what she was talking about! I went on to study Math Education with a focus on middle school in college and I am so excited to be teaching 6th-8th Math at All Saints this year!

Teaching Philosophy

I believe that learning should be fun! Math is full of excitement and I try to pass on the love I have for it to my students. I care about each of my students and I work hard to build relationships with each of them. I believe in running a student-centered classroom and incorporating a variety of teaching techniques and learning opportunities to meet the needs of all learners.
